

Prometheus

Electronic Piezo Lighters

Prometheus electronic piezo lighters have a built-in electronic piezo inside of the lighter. When the ignition button of the electronic piezo lighter is pushed down, butane gas is released from the gas tank and at the same time, an electronic spark is generated. When butane gas and electronic spark come in contact, flame is generated. The turning of the spark wheel of the flint lighters could be hard on your thumb. The electronic piezo lighters have been the choice of smokers who do not like turning the spark wheel of the flint lighters and who prefer visible soft flame to the invisible, strong flame generated by torch flame lighters.

Please note that the paucity of oxygen at a high altitude can prevent the electronic piezo of torch flame and electronic piezo lighters from functioning properly. Please use the flint lighters in a high altitude region such as Swiss Alps, Mexico City, Colorado (U.S.A.) and New Mexico (U.S.A.).

Prometheus

Flint Lighters

When you open the cap of the flint lighters, butane gas from the gas tank is automatically released. When you turn the spark wheel of the flint lighters, the spark wheel turns against flint, a tiny stone. The friction between the spark wheel and flint generates spark. When butane gas meets this spark, flame is ignited. After you use the flint lighters, you must close the cap in order to extinguish the flame and also, to prevent butane gas from evaporating. Some smokers prefer the flint lighters because:

- 1) the flame is visible
- 2) once the flame is ignited, the flame will stay on even though you do not continuously hold down the ignition button of the lighter.

The paucity of oxygen at a high altitude can prevent the electronic piezo of the torch flame and electronic piezo lighters from functioning properly. Please use Prometheus flint lighters in high altitude regions such as Swiss Alps, Mexico City, Colorado (U.S.A.) and New Mexico (U.S.A.).

Churchill X \$125.00

palladium-plated

dual-flame, flint **with punch cutter**

dimensions: 2.4 inches x 1.5 x 0.4 (62 mm x 37 x 11)

X1
vertical / palladium

if you need a larger cut, you can punch two holes on the head of the cigar.

Prometheus

1 9 9 2 - 2 0 0 7

15th Anniversary

Prometheus stole fire from Zeus, the king of Olympian Gods, to bring it to mankind. Enraged Zeus ordered Prometheus to be bound to a desolate rock and attacked by an eagle. Prometheus was punished with a tragic death for his love of mortals. *The Prometheus Bound* (the painting in the front cover) portrays his unwavering endurance of suffering. Prometheus is a courageous hero for mankind.
